DIGI4YOU PROJECT HAS COME TO AN END!

The Digi4You project has come to a successful conclusion with the active participation of all project partners. Throughout the project, we obtained various outputs focusing on NEETs, including "Digital skills training framework, Digital skills training toolkit, Guidebook for youth trainers to improve digital soft skills of youth, Digital Skills Online application, Usability and User Experience Evaluation Tool". Additionally, we had the opportunity to disseminate these outputs to the target group through pilotings, multiplier events, workshops, and various dissemination activities.

During these dissemination activities, we reached out to numerous participants and raised awareness about enhancing the employability-based digital skills of NEETs. Furthermore, the project being featured in the media in Italy and Turkey increased its visibility, resulting in a significant increase in the target audience.

ABOUT PROJECT

"**Digi4You**" project aims to improve the competence of NEET by increasing digital skills and increasing their employability using ICT tools and soft skills development. Also, it aims to increase their ability to create quality content on online mediums, create their own digital portfolio, produce engaging presentations, and connect with other professionals.

GOALS

The Toolkit aims to improve the knowledge and competences of youth workers in training young people on digital skills.

This result can be used by teachers, trainers, school directors, psychological consultants, education centres and educational NGOs for personal development.

It aims to:

- boost NEET's employability via digital skills education and ICT use,
- expand NEET's ability in problem-solving, creativity and communication,
- increase NEET's time management and team working skills,
- develop strategic and integrated use of ICT for NEETs and Youth Trainers.

DIGITAL SKILLS DEVELOPMENT TOOLKIT FOR YOUNG NEETS TO INCREASE EMPLOYABILITY

DiGi4YOU

R5 : USABILITY AND USER EXPERIENCE EVALUATION TOOL

2021-2-TR01-KA220-YOU-000047996

DIGITAL SKILLS ONLINE APPLICATION

The application, boasting a diverse array of resources including videos, a guidebook, digital tips, exercises, and tools, is positioned to redefine digital skill development. Crucially, it will be freely available and optimized for Android devices, ensuring accessibility for all users. With its impending upload to Google Play, the application is primed to empower users with an abundance of digital knowledge.

The Digital Skills Online Application is poised to democratize digital education, offering users a rich repository of resources for continuous learning. By serving as a cornerstone for digital skills training, the application will raise awareness and accessibility for youth trainers and beyond.

With its tailored approach to digital learning, the application addresses the need for organized and targeted digital education materials. Its unique mobile interface provides users with a comprehensive suite of resources, enabling learning anytime, anywhere.

This initiative holds vast potential for transferability across educational sectors. From teachers to trainers, school directors to educational NGOs, the application promises to be a versatile tool for personal and professional growth in the digital age.

USABILITY AND USER EXPERIENCE EVALUATION TOOL

Digi4You Usability and User Experience Evaluation Tool has reached its completion, presenting a meticulously crafted evaluation plan tailored for seamless integration throughout the project implementation. Its objectives, including establishing baseline performance and validating performance measures, have been accomplished, laying a robust foundation for further advancements. This culmination brings forth a myriad of impacts, from the development of a feedback mechanism enhancing end-users' efficiency and productivity to the promotion of greater awareness and efficacy surrounding memory coaching training for youth trainers. Noteworthy among its innovative elements is the integration of a specially designed online feedback system, offering end-users objective and swift self-assessment capabilities. With the successful realization of this tool, Digi4You charts a course towards a more streamlined and impactful digital future, poised to elevate user experiences and efficiency across educational settings.

PILOTING ACTIVITIES

More than 100 people participated in the piloting activities in partner countries (Italy, Turkey, Austria, Spain), where the finalised Digi4You materials were tested and shared with potential beneficiaries.

The collective feedback from the piloting satisfaction surveys was very positive. Across all responses, satisfaction levels were very high, with not a single respondent rating the piloting activities "not satisfactory".

The most useful aspects of the training identified by participants include digital identity development, content creation, digital portfolio preparation, and communication skills. These modules were found to be effective in improving NEETs' digital skills and employability prospects.
